UNESA

Quality Standard

According to Republic of Indonesia Law number 12 year 2012 article 52 paragraph 1 to 4, it is stated that the need for quality assurance for the implementation of quality education in order to obtain quality education and produce graduates who are able to actively develop their potential and produce science and / or technology that is useful for society, the nation and country.

The quality assurance system in higher education is carried out internally by the university through the implementation of the internal and external quality assurance system (SPMI) and externally carried out by BAN PT and LAM PTKEs.

Higher education quality standards are required to have a standard of conformity between the implementation of higher education and higher education standards consisting of national higher education standards with higher education standards organized and determined by universities, especially Universitas Negeri Surabaya.

The Quality Assurance System Policy at Universitas Negeri Surabaya is based on the Rector's regulation on the implementation of the SPMI at Universitas Negeri Surabaya. Determination of quality policies and documents consisting of quality policies, quality manuals, quality standards and quality forms are used to establish, implement, evaluate, control, and improve standard quality at Universitas Negeri Surabaya and the Study Program Management Unit / Study Program.

Universitas Negeri Surabaya SPMI standards are written documents containing various criteria, measurements, benchmarks or specifications of all educational activities in Universitas Negeri Surabaya to realize its vision and mission. The functions of the document are:

1. Tools for realizing the vision, mission, and goals of higher education,
2. Indicators to show the level or level of the college,
3. Benchmarks that must be achieved by all parties within Universitas Negeri Surabaya so that it can be a driving factor to work according to standards or even exceeding standards,
4. As authentic evidence of UNESA's compliance with the laws and regulations issued by the government as well as evidence and accountability to the public that UNESA owns and provides services in accordance with the standards set out in law.

For undergraduate program standards in UNESA, referring to Permenristek Dikti No. 44 year 2015 and Permenristek Dikti No. 15 of 2018 refine / change the regulation of Permenristek Dikti no. 44 year 2015.

Based on these regulations, the Standard Development for the undergraduate program at Universitas Negeri Surabaya consists of:

1. Education sector standards,
2. Research field standards,
3. Standards for Community Service,
4. Additional standards related to the delivery of undergraduate education which include
 - 1) Standards for Establishing UNESA Vision and Mission,
 - 2) Student Affairs Standards,
 - 3) Alumni Standards,
 - 4) Cooperation Standard,

- 5) Library Standards,
- 6) Information System Standards,
- 7) Curriculum Standards,
- 8) Governance and Leadership Standards,
- 9) Higher Education Output Standards and Outcomes, and
- 10) International Accreditation Standards

PREPACE

Praise and gratitude to the presence of Allah SWT. for all the favors and conveniences given to us in carrying out various tasks and activities of the Tridharma of Higher Education.

In order to realize the vision of Universitas Negeri Surabaya (Unesa) to become a University that is Excellent in Education, Strong in Science, it is necessary to implement an Internal Quality Assurance System (SPMI) in Higher Education by implementing educational standards, research and community service as well as internal Unesa standards based on the standard PPEPP (Planning-Implementation-Evaluation-Control- Improvement) cycle.

The implementation of Quality Standards requires a basis and a policy as a reference for implementation. The book "Standard Quality (Program of Education Degree) Unesa" This contains the Rector of Unesa policy in implementing the Standards of Quality in Education Programme Bachelor Unesa. This Quality Standard Book is expected to be a guide / guideline for undergraduate programs in carrying out the quality assurance process in their respective work units, especially in the management and implementation of the Undergraduate Education Programme Unesa. Quality Standards are basic provisions as guidelines for the implementation of education in the Undergraduate programme at Unesa and can be used as material for evaluating the quality achievement of Unesa. In this fourth edition, quality standards that have exceeded the Higher Education Standards will be determined and aligned with the APS 4.0 instrument which refers to the 9 criteria of BAN PT.

Hopefully this book can be useful and utilized properly for the successful implementation of quality-oriented management in our beloved Unesa.

Surabaya, October 2019
the Chancellor,

Prof. Dr. Nurhasan M.Kes NIP

CHAPTER I INTERNAL QUALITY ASSURANCE SYSTEM

A. Quality Assurance System in Higher Education

Education is a conscious and planned effort to create an atmosphere of learning and the learning process so that students actively develop their potential to have religious spiritual strength, self-control, personality, intelligence, noble character, and skills needed by themselves, society, nation and state. Higher Education is a level of education after secondary education which includes diploma programs, undergraduate programs, master programs, doctoral programs, and professional programs, as well as specialist programs, which are organized by universities based on Indonesian culture. Higher education as part of the national education system has a strategic role in educating the nation's life and advancing science and technology by paying attention to and applying humanities values as well as the sustainable culture and empowerment of the Indonesian nation. To increase the nation's competitiveness in the face of globalization in all fields, higher education is needed that is capable of developing science and technology and producing intellectuals, scientists and / or professionals who are cultured and creative, tolerant, democratic, strong character, and dare to defend the truth for the benefit nation. Law No.12 of 2012 article 51 (1) states that quality higher education is higher education that produces graduates who are able to actively develop their potential and produce science and / or technology that is useful for society, nation, and state and paragraph 2 states that the government organizes Higher Education quality assurance system to obtain quality education. Furthermore, in article 52 paragraph 1-4 it is stated that (1) Higher education quality assurance is a systemic activity to improve the quality of higher education in a planned and sustainable manner. (2) The quality assurance as referred to in paragraph (1) shall be carried out through the stipulation, implementation, evaluation, control and improvement of higher education standards. (3) The Minister shall determine the higher education quality assurance system and the National Higher Education Standards. (4) The higher education quality assurance system as referred to in paragraph (3) is based on the Higher Education Database (PD Dikti). The quality assurance system in higher education is carried out internally by the university concerned through the implementation of the Internal Quality Assurance System (SPMI) and externally carried out by BAN PT and LAM PTKES through the External Quality Assurance System (SPME) Based on Permendikbud No. 50/2014 Article 1, the quality of higher education is the level of conformity between the implementation of higher education and higher education standards consisting of national higher education standards and higher education standards set by tertiary institutions. Higher education quality assurance system is a systemic activity to improve the quality of higher education in a planned and sustainable manner. Internal quality assurance system, hereinafter abbreviated as SPMI, is a systemic activity of higher education quality assurance by each university autonomously to control and improve

the implementation of higher education in a planned and sustainable manner.

Permendikbud Number 62 of 2016 Article 2 states that an external quality assurance system, hereinafter abbreviated as SPME, is an assessment activity through accreditation to determine the feasibility and level of achievement of the quality of study programs and universities.

The higher education quality assurance system aims to ensure the fulfillment of higher education standards in a systemic and sustainable manner, so that a quality culture grows and develops. The Higher Education Quality Assurance System functions to control the implementation of higher education by tertiary institutions to realize quality higher education.

Picture 1. Higher Education Quality Assurance System

B. Internal and External Quality Assurance System Policy of Unesa

The Internal Quality Assurance System at Unesa follows the regulations based on the prevailing laws. Quality Assurance System Policy at Universitas Negeri Surabaya is based on the rector's regulation regarding the implementation of SPMI in Unesa. Determination of quality policies and documents consisting of quality policies, quality manuals, quality standards and quality forms are used to establish, implement, evaluate, control and improve the quality of PT standards and the Study Program Management Unit / Study Program. The efforts of universities in running SPMI in Unesa are based on PPEPP.

1. Appointment. Activities appointment quality policies and documents, Academic Senate at Unesa to establish quality policies and documents. Every year the standards are revised and developed by considering and controlled based on evaluation by auditing by the Quality Assurance Division at the PT level.
2. Implementation. Activities of implementing quality policies and documents are carried out by all leaders at the university, faculty and study program levels as well as those who carry out activities in education, research, community service, and other support such as

tridarma supporting standards (Student, Alumni, Curriculum, Library, Vision, Mission, Pamong Governance, PT Output, Information Technology, Prodi Specifications).

3. Evaluation. Evaluation activities are carried out by Quality Assurance by conducting audits 1) on line through SSO.SIMPPM by filling in and uploading data tables and documentary evidence and 2) off line through observation and interviews using instruments from the standard to be evaluated. The results of this evaluation will be summarized through an evaluation report based on the implementation of standards and an assessment of the success or lack of standards. Reports will be made by the Quality Assurance Center and given to the leadership.
4. Control. Control activities are carried out by reviewing the evaluation results together between the audit results and the Management Review Meeting (RTM) improvement program. The results of this control will formulate efforts that need to be corrected and solutions to problems in the long or short term.
5. Improvement. Improvement activities are carried out by creating work programs yearly as well as remedial steps in an effort to correct deficiencies that have been identified and also maintain and or improve results that have been declared successful.

PPEPP activities in this internal quality assurance system involve the Academic Senate, Unesa's leaders (Chancellor, Vice Chancellor, Dean, Deputy Dean, Head of Study Program), University Quality Assurance Division, Quality Assurance Group at the Faculty level, and Quality Assurance Unit at the study program level. which synergizes with each other in setting, implementing, evaluating, controlling and improving the quality according to predetermined standards and also evaluating standards that still need to be improved / perfected.

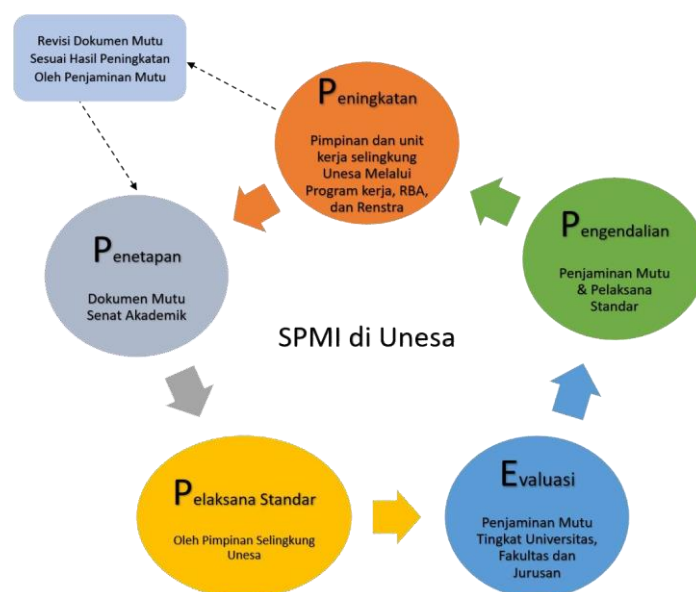

Figure 2. Internal Quality Assurance System in Unesa

CHAPTER II BACHELOR EDUCATION STANDARDS

A. Scope

Higher Education SPMI (PT) Standards are written documents containing various criteria, measures, benchmarks or specifications of all higher education activities of a PT to realize its vision and mission, so that they can be judged to be of quality in accordance with statutory provisions so as to satisfy internal and external stakeholders of PT.

The written document of the SPMI-PT Standard (Quality Standard) functions, among others, as:

1. Tool to realize the vision, mission and goals of PT;
2. Indicators to show the level (level) of PT quality;
3. Benchmarks that must be achieved by all parties within the PT so as to become a motivating factor for working with, or even exceeding, standards;
4. Authentic evidence of PT compliance with laws and regulations and evidence to the public that the relevant PT actually owns and provides educational services using standards.

The SPMI-PT standards in each PT must meet and be able to exceed the National Education Standards. Guidelines for the translation of the National Education Standards into various standards in the SPMI-PT as well as guidelines for the formulation of standard statements.

The development of standards for the undergraduate program at Universitas Negeri Surabaya (Unesa) was prepared according to the Regulation of the Minister of Research, Technology and Higher Education number 44 of 2015 concerning National Higher Education Standards (SN Dikti) and Regulation of the Minister of Research, Technology and Higher Education number 50 of 2018 concerning Amendments to the Regulation of the Minister of Research, Technology and Higher Education number 44 of 2015, especially in human resource standards. In accordance with these regulations, the minimum undergraduate education standards have educational standards, research standards, and community service standards which total at least 24 Standards.

Standards in education include (1) Graduate Competency Standards, (2) Learning Content Standards, (3) Learning Process Standards, (4) Learning Assessment Standards, (5) Lecturers and Education Personnel Standards, (6) Learning Facilities and Infrastructure Standards, (7) Learning Management Standards, and (8) Learning Financing Standards for undergraduate programs apply to all undergraduate programs at Universitas Negeri Surabaya.

Research standards include (1) Research Result Standards, (2) Research Content Standards, (3) Research Process Standards, (4) Research Assessment Standards, (5) Researcher Standards, (6) Research Facilities and Infrastructure Standards, (7) Research Management Standards, (8) Research Funding and Financing Standards.

Community Service Standards include (1) Community Service Results Standards, (2) Community Service Content Standards, (3) Community Service Process Standards, (4) Community Service Assessment Standards, (5) Community Service Implementation

Standards, (6) Standard for Community Service Facilities and Infrastructure, (7) Standard for Community Service Management, (8) Standard for Community Service Funding and Financing.

Additional standards relating to the implementation of undergraduate education at the Universitas Negeri Surabaya (Unesa) include (1) Unesa Vision and Mission Standards, (2) Student Affairs Standards, (3) Alumni Standards, (4) Cooperation Standards, (5) Library Standards, (6) Information Systems Standards, (7) Curriculum Standards, and (8) Governance and Leadership Standards, (9) PT Output and Achievement Standards, (10) International Accreditation Standards

A. Purpose of Preparation of Standard Book of Universitas Negeri Surabaya

Facilitating study programs related to the following matters.

1. Produce benchmark documents that must be met in the delivery of education.
2. Produce benchmark documents that must be fulfilled in conducting research.
3. Produce standard documents that must be fulfilled in the implementation of community service.
4. Produce benchmark documents that must be met in the implementation of the quality assurance system that applies internally at Universitas Negeri Surabaya.
5. Produce benchmark documents that must be met in the implementation of an international accreditation / certification system (AUN, ASIIN, ASIC and others).

B. Policy Foundation

1. Law Number 20 of 2003 concerning the National Education System.
2. Law Number 12 of 2012 concerning Higher Education.
3. Law Number 14 of 2005 concerning Teachers and Lecturers.
4. Presidential Regulation Number 8 of 2012 concerning the Indonesian National Qualifications Framework.
5. Government Regulation Number 32 of 2013 concerning National Education Standards.
6. Government Regulation Number 37 of 2009 concerning Lecturers.
7. Permendikbud Number 73 of 2013 concerning the Implementation of the Indonesian National Qualifications Framework.
8. Permenristekdikti Number 44 of 2015 concerning National Higher Education Standards.
9. Permenristekdikti Number 61 of 2016 concerning Higher Education Database.
10. Permenristekdikti Number 62 of 2016 concerning Higher Education Quality Assurance System.

12. Circular of the Minister of Research, Technology and Higher Education Number 255 / B / SE / VIII / 2016 concerning Guidelines for Higher Education Curriculum Development
13. BAN PT Regulation Number 59 of 2018 concerning Instruments for preparing the LED and LKPS APS 4.0 and APT 3.0
14. Minimum Service Standards for Universitas Negeri Surabaya as PTN BLU
15. Universitas Negeri Surabaya Academic Policy in 2016

16. Strategic Plan (RENSTRA) of Universitas Negeri Surabaya for 2016-2020

C. Vision, Mission, Goals and Policies of Unesa

1. Vision

The development and implementation of Unesa's internal quality assurance system is inseparable from the vision to be achieved. Unesa's vision is to excel in education, strong in science.

2. Mission of Unesa

- a. Increase the quantity and quality of human resources, access, equity, quality and relevance of education.
- b. Developing institutions that are recognized nationally and internationally.
- c. Develop quality infrastructure and are oriented towards eco and cyber campus.
- d. Carrying out high quality tridarma colleges and useful for community development.
- e. Increase Unesa's competitiveness in the fields of education and science and technology.

3. Purpose of Unesa

To carry out the mission and achieve Unesa's vision, the goals that Unesa had to achieve were formulated, namely:

- a. Fulfillment of the quantity and quality of human resources.
- b. Realizing the quality of academic services.
- c. The realization of superior educational and scientific programs.
- d. The realization of partnerships with stakeholders at large and the image of a highly competitive campus.
- e. The realization of organizational arrangements and eco-oriented facilities and cyber campus.
- f. The realization of the development of a transparent and accountable state property and financial management system.
- g. Realizing the quality of student coaching.
- h. Realizing the quantity and quality of research and community service.

As a university that is committed to improving quality in all aspects of implementing academic and non-academic programs, Unesa has a quality statement "In order to participate in national development through the provision of human resources, Unesa is committed to guaranteeing the quality of graduates by implementing an internal quality assurance system. on an ongoing basis ".

4. Profile of Unesa Graduates

In accordance with the vision, mission, and goals, Unesa graduates have the following competency profiles

- a. Become professional, faithful, intelligent, independent, honest, caring and tough educators and non-educators (dream of beauty).
- b. Able to act as citizens who are proud and love their homeland, and support world peace.
- c. Able to work together and have social sensitivity and high concern for society and the environment.
- d. Respect the diversity of cultures, beliefs, and religions, as well as the original opinions / findings of others.
- e. Upholding law enforcement and having the spirit to put the interests of the nation and society at large.
- f. Have an entrepreneurial mentality so that they can create jobs and / or be able to compete in the job market in the era of globalization.
- g. Have sincerity, commitment, sincerity to develop the attitudes, values, and abilities of students.
- h. Have skills / expertise / abilities in completing work, master science and technology, master methods and abilities in applying science / knowledge, and have managerial abilities, a level of autonomy and responsibility in carrying out their duties according to their education level.

RI Law No. 12 of 2012 concerning Higher Education article 54, states that higher education standards consist of: 1) national higher education standards set by the minister at the suggestion of an agency tasked with compiling and developing national higher education standards; and 2) higher education standards set by each tertiary institution with reference to the National Higher Education Standards. Higher education institutions have the flexibility to regulate the fulfillment of the National Higher Education Standards by referring to existing regulations. Universitas Negeri Surabaya develops academic standards for undergraduate education in accordance with Permenristekdikti Number 44 of 2015 concerning National Standards for Higher Education and Permenristekdikti Number 50 of 2018 concerning Amendments to Permenristekdikti Number 44 of 2015 concerning National Standards for Higher Education as follows.

1. National Higher Education Standards

a. Higher Education Standards

- 1) Competency Standards of Graduates
- 2) Standard Learning Content
- 3) Learning Process Standards
- 4) Learning Assessment Standards
- 5) Standards for Lecturers and Education Personnel
- 6) Standard Learning Facilities and Infrastructure
- 7) Learning Management Standards
- 8) Learning Financing Standards

b. Research Standards

- 9) Standard research results

- 10) Standard research content
- 11) Standard research process
- 12) Research assessment standards
- 13) Researcher's standards
- 14) Standard research facilities and infrastructure
- 15) Research management standards
- 16) Research funding and financing standards

c. Community Service Standards

- 17) Standard results of community service
- 18) Standard content of community service
- 19) Standard community service process
- 20) Standard of community service assessment
- 21) Standard for implementing community service
- 22) Standard facilities and infrastructure for community service
- 23) Standard management of community service
- 24) Funding standards and community service financing

2. Internal Standards of Universitas Negeri Surabaya

- 25) Standard for Establishing Vision and Mission
- 26) Student Affairs Standards
- 27) Alumni Standards
- 28) Cooperation Standards
- 29) Library Standards
- 30) Information System Standards
- 31) Curriculum Standards
- 32) Governance and Leadership Standards
- 33) Output Standards and Achievements of PT
- 34) Standard Prodi Specifications

3. International Accreditation Standards

- 1) Standards 1. Learning Achievement
- 2) Standards 2. Prodi Specifications
- 3) Standards 3. Study Program Structure
- 4) Standard 4. Approach in Teaching and Learning
- 5) Standards 5. Student Assessment
- 6) Standards 6. Quality of Academic Staff
- 7) Standard 7. Support Staff Quality
- 8) Standard 8. Quality and Student Support
- 9) Standard 9. Facilities and infrastructure
- 10) standard 10. Quality Improvement Standards
- 11) Standard 11. Output

E. Quality Assurance System Tools

Based on the above mentioned Unesa Internal Quality Assurance System (SPMI) policies, the tools needed for the implementation of SPMI in Unesa are as follows.

1. Manual of Unesa's Internal Quality Assurance System

The Unesa SPMI Manual is a guideline or guide for internal stakeholders to carry out Unesa's internal quality assurance. The Unesa SPMI Manual explains that the overall implementation of Unesa's internal quality assurance system is used to appointment, implement, evaluate, control, and improvement standards related to the quality assurance system

2. Quality Standards and Quality Targets

Quality standards are benchmarks that must be met in the implementation of education, research, community service according to national higher education standards. Quality standards are also a benchmark that must be met by internal stakeholders against the standards developed by Unesa.

Quality standards are set for each level of education by adopting or modifying the National Higher Education Standards (SN Dikti), the National Higher Education Accreditation Board (BAN-PT) and additional standards applicable at the Unesa level. The quality standard is subsequently reduced to a quality target. The quality target is a target to be achieved (as a standard) derived from the quality policy. The preparation of quality objectives is the responsibility and commitment of management (leadership). The quality target is set by the unit for a certain period of time by considering the existing achievements compared to the quality standard.

3. Quality Procedure

The achievement of quality standards must be supported by the existence of quality procedures developed by the entire process at Unesa. Quality procedures are guidelines containing mechanisms and work sequences / processes of an activity or activity in order to support the application of a quality management system.

4. Assessment forms and self-assessment checklist

Assessment forms are tools to collect data and information used to assess the appropriateness and quality of higher education institutions.

The achievement of quality objectives for each study program is documented in quality assessment forms and self-assessment checklists. Quality assessment forms and self-assessment checklists serve as instruments for planning, implementing, controlling, and developing standards. The completed forms are referred to as quality records, and serve as evidence of the implementation of activities.

F. Internal Quality Assurance Cycle

Based on Article 52 (2) of Law Number 12 of 2012 and Article 5 of Permendikbud Number 50 of 2014, the mechanism for implementing the Internal Quality Assurance System (SPMI) in Unesa through a cycle of activities abbreviated as PPEPP, which consists of:

1. Standard appointment, namely standard-setting activities that refer to the Higher Education National Standards and have referred to the Strategic Plan, Statutes and Unesa's academic policies.
2. Implementation of standards, namely activities to meet the standards set by Unesa.
3. Evaluation of standard implementation, namely the activity of comparing the

- outputs of standard compliance activities with predetermined standards.
4. Control of standard implementation, namely the analysis of causes of a predetermined standard that cannot be achieved, so that it can be used as a basis for corrective action; and
 5. Improvement standards, namely improvement activities for higher standards rather than a predetermined standard.

Figure 3. SPMI Mechanism

G. Internal Quality Assurance System for the Implementation of Undergraduate Education Programs

The internal quality assurance process for the implementation of undergraduate education programs is in principle carried out independently by each study program and faculty. The quality assurance process at the faculty level is carried out by the Quality Assurance Group (GPM) under the coordination of the Deputy Dean for Academic Affairs. At the Study Program level, quality assurance is carried out by the Quality Assurance Unit (UPM) whose implementation is under the coordination of the Quality Assurance Group.

The Unesa Quality Assurance sector plays a role in setting quality standards, quality procedures, quality manuals, quality assessment forms and self-assessment checklists by referring to or modifying the accreditation guidelines issued by the National Accreditation Board for Higher Education (BAN-PT), monitoring and evaluating the extent of assurance quality can be implemented.

The implementation of the internal quality assurance system at Unesa follows the PPEPP cycle as follows:

1. Standard appointment
 - a. The Unesa Quality Assurance Team (BPM) together with representatives from the Quality Assurance Group (GPM) compile quality standards, quality procedures, and internal quality objectives for undergraduate education programs by referring to the national education standards (SN Dikti) and the standards of the National Accreditation Board for Higher Education (BAN-PT).
 - b. BPM prepares an Internal Quality Assurance System Implementation Guide and supporting documents (study program and faculty quality assurance assessment forms). Also compiled a self-assessment checklist of study programs and faculties.
 - c. BPM disseminates quality standards, quality procedures and quality objectives of Unesa to Unesa's faculty and postgraduate students. In addition, the quality assurance assessment documents / forms were also socialized.

2. Implementation of standards

Study programs and faculties carry out activities according to the annual program of study programs and faculties and implement an internal quality assurance system.

- a. The study program (UPM) and the faculty (GPM) formulate programs / activities for the implementation of an internal quality assurance system.
- b. GPM and UPM prepare relevant and necessary documents related to appointment quality standards.
- c. The Quality Assurance Unit (UPM) and the Quality Assurance Group (GPM) at the faculty fill out the internal quality assessment forms and send them the Quality Assurance Center (PPM)
- d. Documents and forms that have been filled in by GPM and UPM will be processed by BPM and used as a database to evaluate the achievement of predetermined quality standards.

3. Evaluation of standard implementation

- a. UPM and GPM monitor the achievement of the specified quality objectives and report them to BPM.
- b. UPM and GPM conduct self-evaluations by filling out a self-checklist assessment so that it can be seen whether there is a gap between the achievement of quality objectives and the quality standards set. For study programs that are currently / will carry out the accreditation process, it is advisable to also complete a self-assessment checklist by following the format according to BAN-PT and the results of filling out the forms reviewed by PPM.
- c. BPM on the assignment of the Rector / Deputy Chancellor for Academic Affairs / Chairperson of LP3M Unesa conducts audits and / or monitoring and evaluation to study programs and faculties with the help of internal auditors to evaluate the extent to which SPMI in study programs and faculties is implemented. The results of internal audits related to the implementation of SPMI are reported by BPM to the Rector / Deputy Chancellor for Academic Affairs / Chairperson of LP3M Unesa.

4. Control of standard implementation

- a. BPM together with GPM conducts a comprehensive evaluation of the implementation of the quality assurance system and the achievement of quality objectives and the results of internal audits. The evaluation results are used as recommendations for corrective actions by the Chancellor.
- b. BPM evaluates and improves the quality management system that is implemented every year, including forms, quality objectives and checklists which are developed by receiving input from study programs, faculties and other related units.
- c. Recommendations from the Chancellor are used by study programs / faculties / UPT to take corrective actions in the next internal quality assurance cycle.

5. Improvement Standard (I)

Based on recommendations from the Chancellor related to the achievement of quality standards and quality objectives by Unesa's study program / faculty / UPT, BPM formulated an increase in Higher Education Standards set by Unesa as an effort to improve standards / measures so that they are higher than the standards / measurements set by SN Dikti.

CHAPTER III STANDARD OF UNIVERSITY EDUCATION

STANDARD 1. GRADUATE COMPETENCY STANDARD (SKL)

1. Description

This standard is the minimum criterion regarding the qualification of graduate abilities which includes attitudes, knowledge, and skills that are stated in the formulation of graduate learning outcomes. SKL is a criterion regarding the qualifications of a graduate's ability which includes attitudes, knowledge and skills. The SKL Standard is used as the main reference for the development of content standard, process standards, education assessment standards, standard for educators and education personnel, standards for facilities and infrastructure, management standards, and financing standards.

2. Definition of Terms

- a. Graduate Competency Standards are the minimum criteria regarding the qualifications of graduate abilities which include attitudes, knowledge, and skills that are stated in the formulation of learning outcomes. In the SKL it is stated that the Learning Outcomes (CP) of Graduates must refer to the KKNI CP description and have the same level of qualification as the KKNI.
- b. Learning Outcomes (CP) are defined as abilities obtained through the internalization of knowledge, attitudes, skills, competencies, and accumulated work experience. CP merupakan calibration (instrument of measurement) of what the acquired person in completing the process of learning either structured or not. The formulation of the CP organized into four elements, namely the attitude and values, ability to work, mastery of knowledge, and the authority and responsibility to answer.
- c. Attitudes and procedures of value: the behavior and order value is a character or identity diribangsa and country Indonesia. Attitudes and system value is internalized during the process of learning, either structured or not.
- d. Work ability: is the final form of the transformation of the potential that exists in each individual learner into applicable and useful competencies or abilities.
- e. Mastery of knowledge: is information that has been processed and organized to obtain the accumulated understanding, knowledge and experience to have an ability.
- f. Powers and Responsibilities: a consequence of a learner who has the ability and knowledge to play a role in supporting people is right and ethical.

3. Standard Reference

- a. Presidential Regulation Number 8 of 2012 concerning KKNI Article 1 paragraph 2.
- b. Permenristekdikti Number 44 of 2015 concerning Higher Education National Standards Articles 5, 6, and 7.
- c. Permenristekdikti Number 62 of 2016 concerning Higher Education Quality Assurance Systems.

STANDAR 4 LEARNING ASSESSMENT

1. Description

Learning assessment standards are the minimum criteria for assessing student learning processes and outcomes in order to meet graduate learning outcomes. The assessment of student learning outcomes takes into account the principles of assessment including: valid, objective, fair, integrated, open, comprehensive and continuous, systematic, based on criteria, accountable.

The assessment carried out by educators / lecturers is not only an assessment of learning, but also an assessment for learning and an assessment as learning. Assessment of learning is carried out to measure students' achievements against competencies which have been set. Assessment for learning allows educators to use information on students' conditions to improve learning, while assessment as learning allows students to see their learning achievements and progress to determine learning targets.

2. Definition of Terms

- a. Learning assessment standards are the minimum criteria for assessing student learning processes and outcomes in order to meet graduate learning outcomes
- b. Assessment is the process of collecting and processing information to measure the achievement of student learning outcomes.
- c. Learning is a process of interaction between students, between students and lecturers and learning resources in a learning environment
- d. Assessment of student learning processes and outcomes include assessment principles, techniques and instrument ratings, the mechanisms and the procedure assessment, implementation assessment, reporting assessments, and graduation. The principles of assessment include educational, authentic, objective, accountable and transparent principles which are carried out in an integrated manner.
- e. Assessment of learning outcomes is carried out in the domains of attitudes, knowledge and skills.
- f. Rate realm of attitudes is done through observation, self-assessment, an assessment of students (students assess his colleagues in the field or group), and assessment aspects of personal y ang emphasize the aspect IDAMAN JELITA
- g. Assessment of the domain of knowledge through various forms of written tests and oral

tests which technically can be carried out directly or indirectly. In the direct intention is lecturers and students meet face-to-face during the assessment. Meanwhile, indirectly, for example, through the provision of take home exams.

- h. Assessment of the realm of skills through performance appraisal which can be carried out through practicum, practice, simulation, etc.

STANDAR 5 LECTURER AND EDUCATIONAL STAFF

1. Description

The standards for Lecturers and Educational staff are the minimum criteria regarding the qualifications and competence of human resources for lecturers and educational staff (administration, technicians, laboratory assistants, archivists, librarians, operators) in Unesa to provide education in order to fulfill graduate learning outcomes. This standard regulates the management of human resources in a transparent, accountable and meritocratic manner, from planning, recruitment, selection, orientation, qualification, placement, employee development, career development, rewards, administrative sanctions and dismissal. This standard also regulates the ratio of permanent lecturers and non-permanent lecturers, as well as the ratio of lecturers and students.

2. Definition of Terms

- a. Lecturers are professional educators and scientists with the main task of transforming, developing and disseminating science, technology and arts through education, research, and community service.
- b. Educational staff are educational personnel who participate in organizing education with special duties as teaching professions, in the form of archivist, laboratory assistant, administration, librarian, operator and technician.

STANDAR 6 LEARNING FACILITIES AND FACILITIES

1. Description

This standard is a minimum criterion regarding facilities and infrastructure according to the needs of the content and learning process in order to fulfill graduate learning outcomes. Standard facilities include: standard for furniture, educational equipment, educational media, books, information technology facilities, sports and the arts. Meanwhile, infrastructure standards include: land standards, classrooms, libraries, laboratories, leadership rooms, lecturers' rooms, administration rooms and public facilities.

2. Definition of Terms

- a. Facilities are anything that can be used as a tool in achieving successful learning in the classroom, for example educational facilities, including buildings, electricity, water, classrooms, tables, chairs and learning media tools.
- b. Infrastructure is a supporting facility for carrying out learning in Higher Education High and include infrastructure, such as yards, parks, fields, roads to schools and others.

STANDAR 8 LEARNING FINANCING

1. Description

Learning financing standards are the minimum criteria regarding components and the amount of investment costs and operational costs that are arranged in order to meet graduate learning outcomes. Higher education operational costs are part of the higher education costs needed to carry out educational activities which include lecturers' fees, teaching staff costs, learning operational materials costs, and indirect operational costs. Higher education operational costs are set per student per year which is referred to as the standard unit of higher education operational costs. The standard for higher education operational unit costs for state universities is set periodically by the Minister by considering: a). type of study program, b). accreditation level of universities and study programs; and c). regional cost index. The higher education operational cost unit standard forms the basis for each university to prepare an annual higher education income and expenditure budget plan (RAPB) and determine the costs borne by students.

2. Definition of Terms

- a. Learning financing is the entire budget used to support the student learning process.
- b. The unit of operational costs is the cost calculated based on the need for operational costs of education that are compiled in accordance with the Legal Entity State Higher Education Service Standards / Contracts for Performance.
- c. The expenditure Budget Plan is the calculation of the amount of costs required for materials and wages, as well as other cost related to the implementation of activities.

STANDARD 10. RESEARCH CONTENT

1. Description

Research content standard is the minimum criterion regarding the depth and breadth of the research material. The depth and breadth of the research material includes material on basic and applied research. Material in basic research must be oriented towards research outcomes in the form of explanations or findings to anticipate new symptoms, phenomena, rules, models, or postulates. Material in applied research must be oriented towards research output in the form of innovation and development of science and technology that is beneficial to society, business, and / or industry.

2. Definition of Terms

- a. Research content standard is the minimum criterion regarding the depth and breadth of the research material.
- b. Postulates are assumptions, estimates, or hypotheses that are recognized or established in such a way that a study can be carried out systematically.

STANDARD 13. RESEARCHER

1. Description

Researcher standard is the minimum criterion for the researcher's ability to carry out research. Researchers must have the ability to master the level of research methodology in accordance with the scientific field, research object, as well as the level of complexity and depth of research. Researcher's ability is determined based on academic qualifications and research results. The researcher's ability determines his authority in carrying out research. Further provisions regarding the authority to carry out research are regulated in detailed guidelines issued by the Unesa Research and Community Service Institute (LPPM).

2. Definition of Terms

Research methodology is a scientific process or way of obtaining data that will be used for research purposes.

3. Standard Reference

CHAPTER 5 COMMUNITY SERVICE STANDARD

STANDARD 17. COMMUNITY SERVICE RESULTS

1. Description

This standard is a reference for the results of community services. The Institute for Research and Community Service (LPPM) must provide quality assurance, policy feasibility and implementation of a system of community service results as well as management of community service results as an integrated quality unit. LPPM must actively participate in the system of community service results in order to be able to produce quality service outputs for the community. LPPM must strive for good access to standard information services resulting from community service. LPPM must manage the lecturers who carry out community service as partners in achieving the set standards. LPPM must actively participate in the empowerment and utilization of community service partners.

2. Definition of Terms

- a. Quality assurance is the process of establishing and fulfilling management quality standards in a consistent and sustainable manner, so that consumers, producers and other interested parties obtain satisfaction.
- b. Policy appropriateness is a policy that can be used to control quality.
- c. Quality unity is integrated quality control in the Institute for Research and Community Service.

STANDARD 18. COMMUNITY SERVICE CONTENTS

1. Description

This standard is a reference for the depth and breadth of community service materials. The depth and breadth of community service materials must refer to standard 17 regarding the community service result standard. The depth of content and breadth of service materials must be sourced from the results of research or development of science, technology, sports, literature and art in accordance with the needs of society.

The Institute for Research and Community Service (LPPM) must provide quality assurance, policy feasibility and implementation of the depth and breadth of community service materials as well as managing the content of community service reports as an integrated quality unit. LPPM must participate actively so that the servants are able to produce quality community service report content. LPPM must strive for access to information about minimal standard of community service reports contents properly. LPPM must manage the service implementing lecturers as partners in achieving the set service report content standard.

2. Definition of Terms

- a. The depth and breadth of the material is the scope of the material content.
- b. Policy eligibility is a criterion for determining whether a subject is eligible for policy determination.
- c. Access to information services is openness in providing information.

3. Standard Reference

- a. Article 56 Permenristekdikti number 44 of 2015.
- b. Article 77 Permenristekdikti number 15 of 2016 concerning OTK Unesa.

STANDARD 19. COMMUNITY SERVICE PROCESS

1. Description

This standard is a reference for the community service process which consists of planning, implementing and reporting activities. The Institute for Research and Community Service (LPPM) must guarantee the quality, feasibility of policies and implementation of community service processes that can be carried out in a directed, measured and programmed manner. LPPM must participate actively so that the community service process runs well. LPPM must strive for good access to standard information services for community service processes. LPPM must manage the lecturers and students who carry out the service as partners in achieving the set standards. LPPM must actively participate in the empowerment and utilization of community service partners.

2. Definition of Terms

- a. Planning as a coordinated service activity to achieve certain goals within a certain period of time.
- b. Implementation is an activity carried out by an activity in a planned, orderly and directed manner in order to achieve the expected goals.
- c. Reporting is a written description of an activity that provides the results and processes of systematically analyzing of a series of activities.
- d. Community empowerment is a process of community service activities in which the community takes the initiative to initiate a social activity process to improve the situation and conditions in their territory.
- e. Community empowerment is an activity by the community in order to get results and benefits.

3. Standard Reference

STANDARD 20. COMMUNITY SERVICE ASSESSMENT

1. Description

This standard is a reference for evaluating community service reports. The assessment of the process and results of community service must fulfill the elements of being educational, objective, accountable and transparent. In providing an assessment, it must also pay attention to conformity with the result standard, content standard, and process standard of community service.

The Institute for Research and Community Service (LPPM) must provide quality assurance, policy feasibility and implementation of a community service assessment system and management of community service report assessment as an integrated quality unit. LPPM must actively participate in producing a quality community service assessment report. LPPM must strive to properly access standard information services for community service assessments. LPPM must manage the service reviewer as a partner in achieving the set service report assessment standard.

2. Definition of Terms

- a. Assessment is the process of gathering and processing information to determine the achievement of activity results.
- b. Active participation is an activity for citizens to participate in determining policies issued by the government.
- c. Reviewer is a reviewer who reviews activities.

STANDARD 21. COMMUNITY SERVICE IMPLEMENTERS

1. Description

This standard is a reference for the excellence of the quality of service / community service held for and related to the development of higher education quality.

Service / community service is carried out as a manifestation of the contribution of expertise, activities to utilize educational results, and / or research in the fields of science, technology, sports, literature and / or arts, in an effort to meet demand and / or initiate an increase in the quality of life of the nation. Good higher education institutions have a management system for collaboration with external stakeholders in the context of organizing and continuously improving the quality of academic programs. The results of the collaboration are well managed for academic interests and as a manifestation of the university's accountability as a non-profit institution. Good higher education institutions are able to design and utilize collaborative programs that involve active university participation and utilize and improve the expertise and quality of university resources.

2. Definition of Terms

- a. Quality improvement is an increase in conformance to requirements, namely in accordance with the requirements or standards.
- b. Higher Education Accountability is the higher education's accountability which can constitute knowledge and accountability for every action, product, decision and policy including public administration of government, and implementation within the scope of a role or work position which includes having an obligation to report, explain and be able to question for each resulting consequence.
- c. Quality of Higher Education's Resources is conformity with the standards in all improvements and management in the resources of higher education.

3. Standard Reference

STANDARD 24. COMMUNITY SERVICE FUNDING AND FINANCING

1. Description

Funding and Financing standards of community service are the minimum criteria for sources and mechanisms of funding and financing of community service in accordance with Permenristek RI No. 44 of 2015.

Funds and fees are components that play an important role in the implementation of community service to produce quality and sustainable service. The university must have an adequate budget so that the implementation of community service is in accordance with the University's Vision and Mission.

The community service standard must refer to the result standard, content standard, process standard, assessment standard, implementation standard, facilities and infrastructure standard, management standard of community service, as well as funding and financing standards of community service.

2. Definition of Terms

- a. Funding is a method used to obtain money to meet the needs of an activity.
- b. Financing is the provision of money or an equivalent claim, based on an agreement between the parties giving the money.

3. Standard Reference
